

BLACK & WHITE FILM, PAPER & CHEMISTRY

FOR THE ART OF REAL SILVER GELATIN PRINTING

ILFORD BLACK & WHITE FILMS

ILFORD PAN F PLUS is a slow black and white film with very fine grain. High edge contrast and extreme sharpness make PAN F Plus a film of exceptional resolving power. PAN F Plus has a speed rating of ISO 50/18° to daylight.

PAN F Plus is ideal for photographing subjects which contain fine detail or when extra large prints are required. It is also suitable for a range of specialist or scientific applications, such as photomicrography or the production of black and white slides.

ILFORD FP4 PLUS is a medium speed black and white film with wide exposure latitude. It exhibits fine grain and excellent sharpness without sacrificing ease of use. FP4 Plus has a speed rating of ISO 125/22° to daylight.

FP4 Plus is an ideal all-purpose film particularly suitable for such work as portraiture, product photography, landscapes and architecture.

ILFORD HP5 PLUS is a fast black and white film. It has excellent push processing characteristics and can be rated up to EI 3200/36°. HP5 Plus has a speed rating of ISO 400/27° to daylight.

HP5 Plus is an excellent choice for journalism, sports, fast action, performing arts and indoor available light photography.

ILFORD DELTA 100 PROFESSIONAL is a medium speed black and white film, designed to give superb image quality. It is the world's sharpest black and white ISO 100 speed film.

DELTA 100 Professional is suitable for any application where uncompromising image quality is the most important criteria for film choice. Its characteristics benefit portraiture, fashion, advertising, architecture and landscape photography.

ILFORD DELTA 400 PROFESSIONAL is a high speed black and white film which sets new standards for fine grain and sharpness. DELTA 400 Professional has a speed rating of ISO 400/27° to daylight.

DELTA 400 Professional is suitable for applications that demand high quality but where extra film speed is an advantage. It is ideal for pictorial, fine art and product photography and for many areas of creative photography that were formerly the preserve of slower films.

ILFORD DELTA 3200 PROFESSIONAL is an exceptionally high speed black and white film for making quality photographs in difficult exposing conditions. DELTA 3200 Professional has a speed rating of ISO 3200/36° to daylight.

DELTA 3200 Professional is ideal for action, such as sports photography, and taking photographs where there is only low light available.

ILFORD XP2 SUPER is a unique high speed black and white film which can be conveniently processed in C41 color negative chemistry. It produces very sharp and fine grain negatives. The films dye image technology gives unparalleled exposure latitude and tremendous versatility.

XP2 SUPER is ideal for general photography, particularly subjects which have an exceptionally wide tonal range or where lighting levels are unpredictable.

ILFORD SFX 200 is a unique ISO 200/24° black and white film that offers the creative photographer opportunities not available with conventional black and white film. SFX 200 has an advanced emulsion with extended red sensitivity which allows the use of filters ranging from yellow to deep red. This combination will produce images with dramatic and unusual tonal reproduction.

ILFORD BLACK & WHITE PAPERS

ILFORD MULTIGRADE IV RC DELUXE is a premium quality black and white variable contrast paper on an exceptionally white Resin Coated base. It gives a full tonal range and superb image quality throughout its wide contrast range of grades 00-5.

MULTIGRADE IV RC Deluxe has an advanced emulsion design which gives you more response where you need it, revealing the subtlest highlight detail yet recording shadows in deep rich blacks.

ILFORD MULTIGRADE IV FB is a premium quality black and white variable contrast paper on a heavyweight Fiber Base. It gives a full tonal range and superb image quality throughout its wide contrast range of grades 00-5.

See website www.ilfordphoto.com for additional photo papers available.

ILFORD BLACK & WHITE CHEMISTRY

ILFORD PHOTO manufacture a wide range of chemistry especially designed to achieve the best results with ILFORD films and papers. Available ILFORD Brands of chemistry are:

ID-11 is recognised as the standard powder film developer which gives normal film speed.

MICROPHEN is a powder film developer where extra film speed is required.

PERCEPTOL is a powder film developer where the finest grain is required.

ILFOSOL 3 is a liquid concentrate film developer which gives normal film speed.

ILFOTEC LC29 is a liquid concentrate film developer for normal and push processing.

ILFOTEC HC is a liquid highly concentrated film developer for normal and push processing.

ILFOTEC DD-X is an excellent fine grain developer which gives full film speed.

MULTIGRADE is a liquid concentrate print developer especially designed to obtain the best possible results from MULTIGRADE papers.

HARMAN WARM TONE DEVELOPER is a liquid developer suitable for dish processing of both RC and FB papers and gives a warmer image tone to most papers.

RAPID FIXER is a liquid concentrate rapid fixer for all modern camera films and papers.

ILFOSTOP is a liquid concentrate stop bath.

WASHAID is a liquid concentrate washing aid to speed up washing and save water.
